

SSIS Update

Issue 284

Social Services Information System

July 2, 2009

Version 5.2 Oracle package update arrives on Monday

A July 1 e-mail alerted county workers that a V5.2 Oracle package update will take place on Monday, July 6, at 4:00 p.m. Staff do not need to be logged off of SSIS during this update.

The package update consists of the following four items:

1. The IV-E Abstract Report was updated to include the placement reasons of Treatment for CD and Treatment for SED for placement settings of Group home, Residential treatment center, Juvenile correctional facility (non-secure, 12 or fewer children), and Juvenile correctional facility (non-secure, 13 or more children). Re-generate any current Title IV-E Abstract Report you are working on and the changes will be reflected.
2. A minor change to the SEAGR "Included Time" functionality was made. This change has no direct user impact.
3. The frequency and percentage of Federal Measure 4.2 in Charting and Analysis was corrected to accurately represent the raw data.
4. Two Placement/Location/Absence end reasons were modified: "Live w/non-custodial parent (agency retains cust/resp)" was changed to "Live w/non-custodial parent" and "Begin trial home visit" was changed to "Begin trial home visit (agency retains cust/resp)." When a child lives with a non-custodial parent, the child is not in placement. The agency may have responsibility, but they do not have custody.

Please contact the SSIS Help Line if you have questions regarding the package update. The Help Line phone number is (651) 431-4801 and e-mail address is ssishelp@state.mn.us.

Upload Update _____

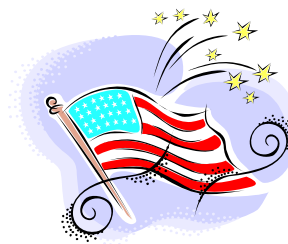

The next upload is due on July 31. It provides a general update of information for statewide research and reporting.

CountyLink Updates _____

- ◆ HINT: Child Findings Tab
- ◆ HINT: Enter Professional Collaterals
