Issue 286

Social Services Information System

August 7, 2009

## Correction to VA-CEP article

SSIS Update #285 (7/24/09) should have stated:

“If you use the "Send to Lead Agency" function to send a report to another county, remember to follow up with a phone call, so that the receiving county knows to check the ~~assignment log~~ **unassigned intakes or Intake Log** for the VA-CEP report.”

We apologize for any confusion this misstatement may have caused.

Also, although there is no longer a need to send follow-up faxes to MN Department of Health OHFC or DHS Licensing, please continue faxes to any county agency to which you send an electronic VA-CEP report of alleged maltreatment of a vulnerable adult.
