

Installing Silverlight 5.1.1 on MnCHOICES Workstations

Purpose:

In order for MnCHOICES Version 1.0 to launch and operate, each workstation must have Silverlight Version 5.1.10411.0 or higher installed. MnCHOICES will be deployed statewide in early 2013; agencies must ensure that Silverlight Version 5.1.10411.0 or higher is installed before the statewide release.

Verification of a Silverlight 5.1.1 Installation:

Follow these steps in order to verify whether or not a workstation already has Silverlight Version 5.1.10411.0 installed.

1. Browse to <http://www.microsoft.com/getsilverlight/Get-Started/Install/Default.aspx>
2. If the top of the page looks like this, you have the latest version of Silverlight:

Get Microsoft Silverlight

The version of Silverlight installed is:
Silverlight 5 (5.1.10411.0)

You are ready to use Microsoft Silverlight

3. Otherwise, you will see a page similar to the following:

Get Microsoft Silverlight

Upgrade Microsoft Silverlight
for a better Web experience

An earlier version of Silverlight has been detected.

Installed version: 4.1.10111.0

Current version: **Silverlight 5 (5.1.10411.0)**

You may need to restart your browser.

4. Click on the "Silverlight 5 (5.1.10411.0)" highlighted text and follow the installation instructions on the web page. Administrative rights to the PC are not required for the installation.
