Client Eligibility Report has bug

There is a print preview bug for the Client Eligibility Report from the Workgroup node. The print preview displays the eligibility for the first person selected on the Setup screen regardless of which page number displays or how many people were selected on the Setup screen.

The printed copy of the report will correctly print the Client Eligibility Report for each person selected on the Setup screen. This display problem is for the print preview only.

AMSSA handouts available online

Fiscal staff provided four handouts during their June 29 AMSSA presentation. Two have been updated since the presentation. Click on the live link within the *CountyLink Additions* box to access all handouts.

Enabling claiming interfaces

Some counties reported receiving an error message when taking the menu option "Enable Current Interface Job" on the claiming interfaces.

The problem that was causing the error has been resolved. If your county ran into the error message, you should now be able to take the menu options to enable the current interface job on the Claims Submission, Claims Acknowledgement, and Claims Status tabs of the Claiming Interface Settings.
