Intensive Supervision - Service Access IV

Relief is not available from caregiver duty. Child is eligible for 8 or more hours a week of services by a professional service provider, including respite care, a Personal Care Attendant (PCA), MA Waiver service provider, in-home nursing, or similar services where the caregiver can leave the child to another's supervision. However, due to the young person's previous aggressive/assaultive behaviors towards service providers, the caregiver cannot access approved services that include a parental relief component. This indicator does not apply if the caregiver has arranged to function as a designated waiver service provider for the child in their care.

Neither Service Access III nor IV

Night Supervision (CHECK ONE):

Intensive Supervision - Night I

Based on a written safety plan developed by the agency or a medical, mental health, behavioral, or corrections professional a caregiver is required on an ongoing basis to get up every night more than once at regular intervals to check on the welfare of a child due to sleep disturbances or other medical or safety conditions.
