Change Preferences to not use JAVA for WEBI reports

Once you have your preferences set, you will be able to filter and sort within WEBI.

1. Click Preferences

2. Scroll down to Web Intelligence and click the arrow to expand
3. Select a default view format: choose Interactive (no downloading required)
   When viewing a document: choose Use my preferred viewing locale to format the data
   Select a default creation/editing tool: choose Interactive (no downloading required)

4. Click OK
