

Horizon Client Download/Install

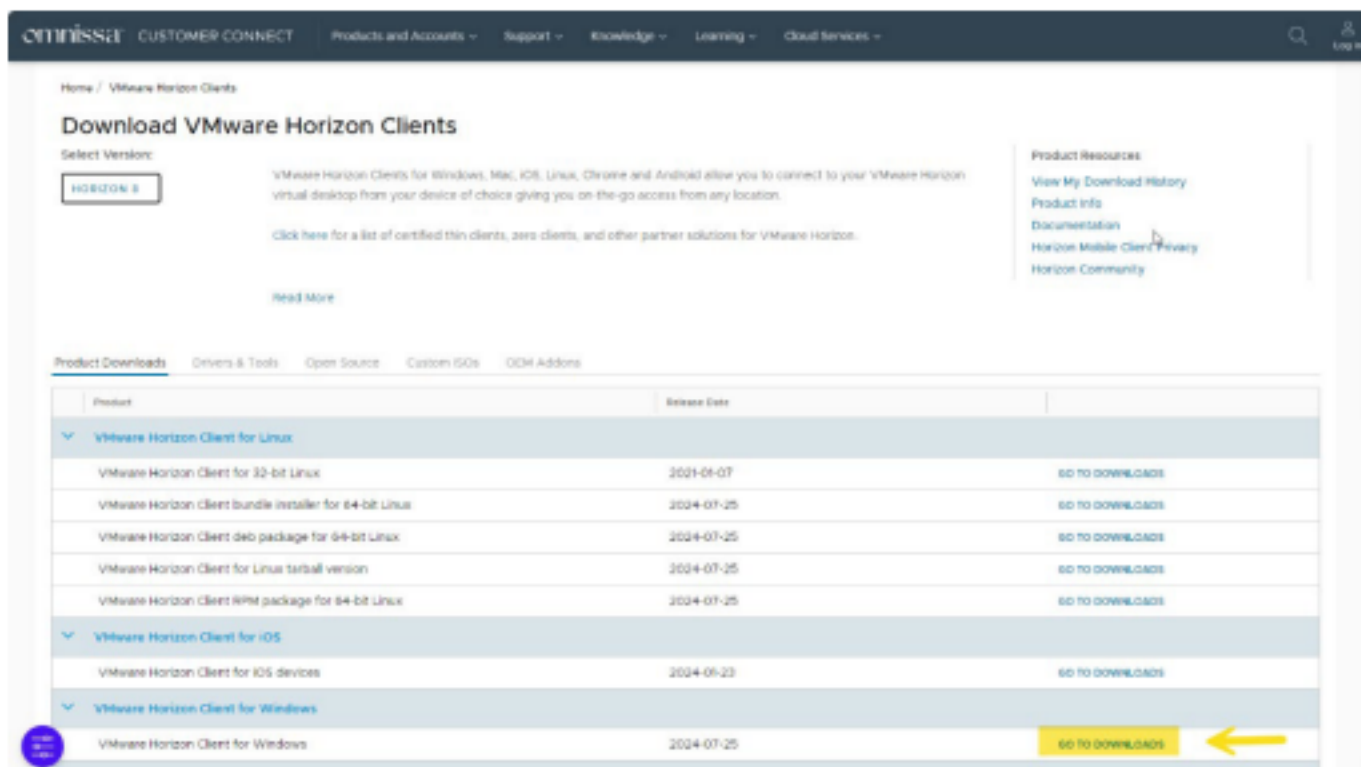

The minimum recommended version of the VMware Horizon Client version is currently set at Version 2406, Build 8.13.0 (998602815) for all agency staff using SSIS.

Use the following instructions to download the Horizon Client from VMware.

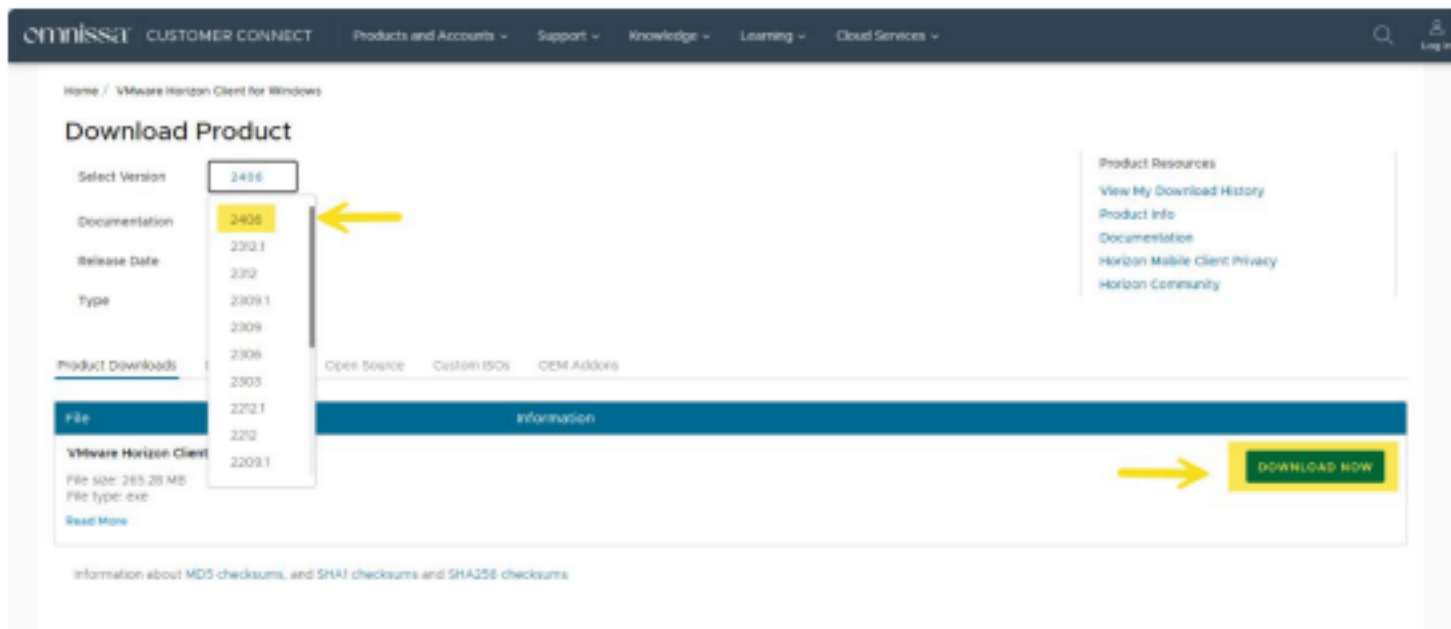

1. Navigate to: <https://www.vmware.com/go/viewclients>
2. Use the **Select Version** drop down box in the upper left corner to select **Horizon 8**

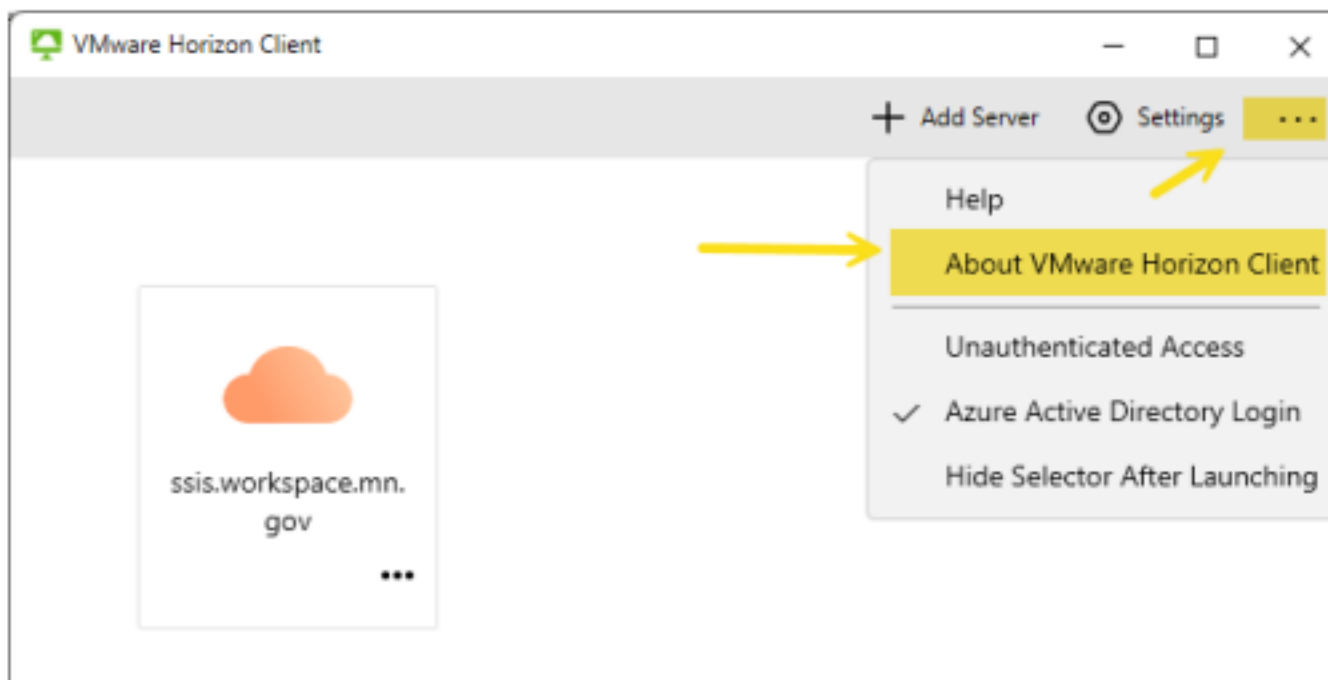

3. Click the **GO TO DOWNLOADS** link for VMWare Horizon Client for Windows

4. Use the **Select Version** drop down box in the upper left corner to select version **2406** and then select **DOWNLOAD NOW**.

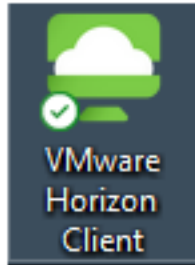

5. Complete the installation as directed. A restart may be required.
6. Once downloaded, verify version 2406 by selecting the icon with **three ellipses** in the upper right corner and **select About VMware Horizon Client**.

Logging into SSIS by Agency Staff

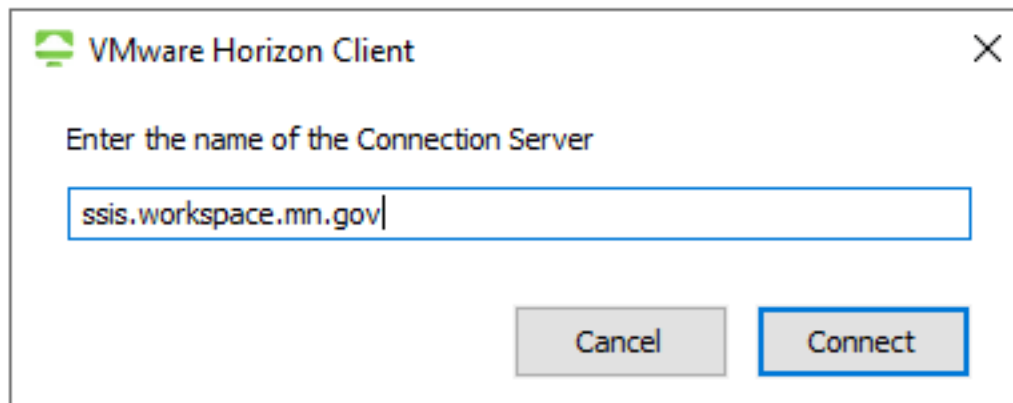

1. Open the VMware Horizon Client

2. Select **New Server**

3. Enter **ssis.workspace.mn.gov** and click **Connect**

4. Enter your **SSIS User name and Password**
